Suzhou Dialogue

Innovative Drug
Innovative Package
Face to Face
Leader of Pharmaceutical Packaging

China National Pharmaceutical Packaging Association (CNPPA) has been deeply involved in pharmaceutical packaging area for almost 40 years. As the leader, it guides the industry from sketch and crudeness to a position leading the world in some market segments. CNPPA enjoys outstanding professional competence, international vision and policy insight.

-Outstanding professional competence-

Professional competence is the root of the association. We have been upgrading ourselves and give a full play to the role as industry association. We conduct strategic studies on standardization and formulate or revise association standard. Up to date, we have issued almost 20 association standards. Since 2011, we have organized New Products & Technology Competition. It encourages new products and technologies oriented by clinical value. This event has become the compass for the development of pharmaceutical packaging industry.

CNPPA organized publication of technology books such as Leachables and Extractables Handbook, Compatibility of Pharmaceutical Products and Contact Materials and Practical Handbook of Pharmaceutical Packaging Material. CNPPA owns two journals: Pharmacy & Packaging and Pharmaceuticals Packaging & Medication Safety.

-International Vision-

As the only industry association at state level throughout countries in the world, we enjoy good mastery on the trend of development globally and new products/technologies.

We have constant and close cooperation with organizations such as USP, UBM EMEA and the Asian society of innovative packaging technology. We regularly take part in international events such as Pharmapack Europe, Annual Meeting of PDA, INTERPHEX JAPAN and organize China–Japan Pharmaceutical Packaging Technology Exchange annually in Japan.
Policy Insight

Since establishment, CNPPA has been actively involved in policy making and implementation. It has undertaken quite a few research projects for governmental departments. The staff members of the secretariat of CNPPA participated in the formulation of "Planning and Guideline for the Development of Pharmaceutical Industry" as members of the Expert Advisory Committee, and in particular the "Packaging System and Drug Delivery Device" section. CNPPA participated in the formulation and revision of the relevant documents related to the connected review system of pharmaceutical packaging materials, pharmaceutical excipients and drugs. Entrusted by the Drug and Cosmetic Registration Department of China Food and Drug Administration, CNPPA drafted the "Technical Guideline for the Change of Pharmaceutical Packaging Materials (Draft for Soliciting Opinions)". We have undertaken research projects entrusted by the National Health and Family Planning Commission and China Food and Drug Administration, including "Study on Pharmaceutical Packaging Material Administration and Evaluation System", "Study on Standardization Strategy for Pharmaceutical Packaging", and "Guidance on Evaluation of Clinical Usage of Basic Infusion".

Trustable event organization capability

Since 2006, we have successfully organized 5 editions of FIPD forum with 600 attendees for each edition. This event is the first in China to introduce concepts and practice such as drug–packaging compatibility study and toxicology evaluation. In 2017, we organized four workshops on connected evaluation and review of drugs and packages with scale of 200 attendees. These events helped our members to obtain a better understanding of connect review and render more support.

Suzhou Industrial Park (SIP) beyond your imagination

Powerful R&D resource and policy support

It covers an area of 278 square kilometers and has a population of 1.2 million. The per capita GDP is about 293,000 CNY. There are more than 70,000 companies in the park, and the R&D capability is No.1 in the country. SIP owns abundant hard resource, soft resource and funding. Among them, it has the largest equity investment and venture capital fund, with a total scale of 60 billion CNY.

Sound ecological system for pharmaceutical R&D

SIP is recognized by home and abroad as the most fast-growing and best biopharmaceutical zone. It has more than 1,000 bio–pharmaceutical companies, including more than 700 innovative start-up companies with independent brands. There are more than 170 foreign companies including GSK, Lilly, Johnson & Johnson and other world-renowned companies. In 2017, the output of biomedical products reached 61.5 billion CNY.

In 2012, Nature commented that SIP had a sound industrial development ecosystem that can promote the innovation and development of biopharmaceutical industry.
UBM EMEA

UBM EMEA is a subsidiary of UBM plc listed on London Stock Exchange. It is the second largest trade fair organizer in Europe and hosts Pharmapack Europe. The exhibition focuses on innovations in pharmaceutical packaging and drug delivery systems. It is held in Paris in February each year. The two-day technical forum brings together more than 400 high-quality exhibitors from around the world and more than 5,000 management and technical professionals from clinical, pharmaceutical research and development, production and procurement departments. Staff and technicians. At the same time, the jury of the Pharmapack Awards, which is composed of hospital clinical experts and pharmaceutical experts, will announce “Outstanding Innovative Products of the Year” on the first day of the event. It has become the compass of innovation in the field of pharmaceutical packaging and drug delivery systems.

Suzhou Dialogue

With the great support of SIP and UBM EMEA, we will hold “Suzhou Dialogue” in Suzhou of Jiangsu Province from 30th August to 1st September. As a response to new technologies, new policies, and new situations, “Suzhou Dialogue” is committed to creating an international, cutting-edge, highly specialized, pharmaceutical packaging system/delivery device platform that integrates exchange, demonstration and site visits.

Premier Keqiang Li gave a high comment to the breakthrough in the reform of the review and approval system for drugs and medical devices when he addressed annual government work report during the 13th National People's Congress. The tide of reform has not diminished. China has been making progress on the journey to the globalization of drug development and registration. Under the new situation, as the ultimate responsible party for drug quality, MA holders share the future with APIs manufacturers, pharmaceutical excipients manufacturers and packaging materials providers. In particular, with the vigorous development of biotechnology, drug products have more specific and customization requirements on APIs, excipients and packaging materials.

Then, numerous problems emerge. To name just a few.

1. How could a drug in R&D select appropriate pharmaceutical packaging system/drug delivery device?
2. How could a pharmaceutical packaging system/delivery device supplier have a deep insight into needs of the MA holder in a timely manner?
3. How could we experience in person innovative products/technologies in the field of pharmaceutical packaging systems/drug delivery devices from home and abroad?
4. How shall we adapt to/ embrace new regulatory actions regarding review, approval and approval of drugs?

"Suzhou Dialogue" will invite industry leaders, experts, scholars, and corporate executives to share ideas on drug products, pharmaceutical packaging and other ideas in the field, gather consensus from all parties, collect wisdom, and jointly build an innovation mechanism for pharmaceutical packaging systems/drug delivery devices.

The program is subject to further update. Please follow up with the [meeting information] column of official website www.cnppa.org. We very much welcome everyone's valuable suggestions on "Suzhou Dialogue".

Some sessions of the conference will have Chinese–English and Chinese–Japanese simultaneous interpreting.
Topics of “Suzhou Dialogue”

Various functions

"Suzhou Dialogue” is composed of a series of conferences, accompanied by innovative/technology demonstration, food tasting and site visit to companies in Suzhou.

Conferences include plenary meeting, specialized seminar, specialized training and small private meeting with different depth and specialty.

Topics (to be updated)

Aug. 31st morning, Innovation Forum, innovation demonstration.
Aug. 31st afternoon– Sep.1st, about 12 parallel seminars/forums, innovation demonstration.

**Arrangement Details**

**Date and venue**

Date: Registration on Aug 30, meeting Aug 31– Sep 1  
Venue: World Hotel Grand Dushulake Suzhou  
[ No. 299 Qiyue Street, Suzhou Industrial Park, Suzhou ]

**Contact**

Jing Ma  
Tel: +86–10–62267180 ext8012  
Email: majing@cnppa.org

**Application**

1. Visit www.cnppa.org and have online registration through Conference Information column of the home pate;  
2. Visit Wechat public account of CNPPA and have online registration through"Event Journal"column.

**Note**

This event only accepts online registration, without onsite registration option.
