## 2017 NEW-PT is ready

Evaluation of New Products/Technology for Pharmaceutical Packaging (New-PT), once two years, started in 2011, has become an indicator of China's pharmaceutical packaging industry development. The mission of NEW-PT is to promote industry development and technical advance. New-PT has gained a great support from our members, has been recognized and appreciated by Chinese government. Meanwhile, many award-winning projects obtained policy support and financial support from national and local government.

2017 NEW-PT is ready, it will focus on guidelines for development of medical industry, qualities of generic drugs and the therapeutic equivalence assessment.

### **Application :**
